USS NEW JERSEY: PAST, PRESENT & FUTURE

The Battleship New Jersey is working on a new exhibit featuring the FIRST Battleship USS New Jersey (BB-16) and the THIRD USS New Jersey (SSN-796) a Virginia-Class attack submarine laid down last month.

The centerpiece of the new exhibit will be a full-size replica of BB-16's bell from 1906 which has been on display in Elizabeth, New Jersey, since that ship was decommissioned in 1920. Last month, Brady Watson, owner of IBILD Solutions, visited the bell (pictured). Headquartered in Southern New Jersey, IBILD Solutions are experts in 2D/3D digitizing, metrology and digital fabrication. Brady did a high-resolution scan of

the bell which will be used to create the full-size replica. For more information about IBILD Solutions visit -www.ibild.com - or call (856) 367-1189.
